FORBES FIRE-RATED SLIDING DOOR (-/60/60)

DESCRIPTION

FORBES fire rated sliding door provides maximum security for people and properties installations and users in case of fire outbreaks. Its reinforced design is ideal for sectioning and protecting certain areas within commercial, residential housing and medical complexes, preventing the spread of fire from the outside in. Sliding feature saves spacing in enviornment design. We have stayed true to our vision of constant reinvention of our materials and products. As a result, we manufacture a wide range of sophisticated fireproof doors which understand the market and are adaptable to the constant changes of their requirements.
